Anti-Microbial Film (Cu+) adhesive backed Custom 'Kiss Cut' A4	£ 15.00

Notes:

a. Adhesive backed film can be applied dry by removing the silicone backing and applying direct to the surface. Care must be applied to alleviate air bubbles and achieve good alignment. Alternatively soap water may be applied to the surface of the receiving panel first and the exposed adhesive slid into position squeegeeing the water out.

b. 'Kiss Cutting' is the process of cutting through the Cu+ film without cutting the backing paper. This way the cut shape may then be easily peeled off of the backing paper. Custom shapes can be 'kiss cut' by supplying dimensions of the required shape via a line drawing or in a digital format.
